## Objective

Motivated and detail-oriented Web Developer with strong expertise in Java, JavaScript and React.Js with. Proficient in developing scalable web application, managing databases, and collaborating within Agile Environment.

## Education

**GITAM University, Hyderabad – Bachelor of Technology**                     August 2021 – Present

Bachelor of Technology in Computer Engineering

- Related Coursework: Fall 2025 (Web development, Software Engineering)

**NARAYANA Jr. Collage, Hyderabad – Senior Secondary**                     April 2019 – May 2021

## Skills

- **Programming Languages:** Java, JavaScript, Python, MATLAB
- **Web Development:** HTML, CSS, React.js
- **Database Knowledge:** MySQL
- **Version Control:** Git, GitHub
- **Methodologies:** Agile, code reviews, debugging
- **Soft Skills:** Team collaboration, communication, problem solving, Technical Documentation, Report Writing.

## Experience

**Java Industrial Training** (*Plasmid*)                     Aug 2024 – Sept 2024

Designed and implemented **5+ banking features** for a multi-role system (customers, employees, admin). Developed a secure login, ensured **100% data validation**, and handled deposits, withdrawals, and **1.5% monthly interest calculations**.

**Web Development** (*Intershala*)                     Jun 2023 – Sept 2024

I worked as a full-stack developer, building a user-friendly interface and integrating back-end APIs for product listings, shopping carts, and payment processing. I focused on enhancing user experience by optimizing site performance and implementing personalized recommendations and secure user authentication.

## Project

**Bank Management System** (*Java project*)

Designed and implemented **5+ banking features** for customers, employees, and admin roles. Developed a secure login system, ensured **100% data validation**, and implemented deposit/withdrawal processes with **monthly interest calculations (1.5% per month)**.

**Enhancing Cloud Storage security using Machine learning** (*Anomaly detection*)

Research and Designed projects on **Enhancing Cloud Storage security using Machine learning**. Here, we went through lots of research paper and worked according to build our first enhance security system in **AWS**.

**Portfolio Website** (*Web Development*)

Created a professional portfolio website showcasing technical skills in HTML, CSS, JavaScript, Java, and DBMS. Designed a responsive and visually appealing interface to highlight projects and expertise.
